

- Key:
- Indicative extent of limited intervention works
 - Sites of Special Scientific Interest (SSSI)
 - Proposed Special Protection Areas (pSPA)
 - Maritime Cliffs and Slopes BAP Habitat
 - Long Distance Walking Paths
 - Local Footpaths

NOTE:
Natural England is currently reviewing SSSIs on the East Yorkshire coast. The review includes a potential extension to the boundary of the Flamborough Head SSSI. The revised boundary (should the site be notified) would include the slope at Flat Cliffs. The site is yet to be notified as SSSI however.

Title:
Sites designated for nature conservation

Project:
Flat Cliffs PAR
