

GENERAL NOTES

1. All works are to be undertaken in accordance with best practice, in particular CIRIA report C584, and Environment Agency guidance.
2. A Site Waste Management Plan needs to be produced prior to any works taking place.
3. All works should be appropriately fenced off, with information and safety signs provided where required. Contact details should be presented should the public wish to raise any concerns or complaints.

Break out bedrock and oversite, where necessary, and cast mass concrete foundation.

Potential disturbance to overwintering foraging sea birds and to tourism and recreation.

Works to avoid peak overwintering bird and tourism periods (December to February and July to August, respectively).

Break out bedrock and existing foundation, where necessary, and cast a mass concrete toe protection. Localised sea wall resurfacing and replacement of wave return.

Potential disturbance to tourism and recreation.

Works to avoid peak tourism period (July to August).
